ECOTECH WATER ENTERS THE ASIAN MARKET

(Singapore) Terry Janssen, CEO of Ecotech Water has confirmed that arrangements with ECOTECH WATER ASIA PACIFIC PRIVATE LTD have been completed with Philip Tan, CEO for Ecotech Water Asia Pacific. Mr. Tan stated at a recent Press Conference that water shortages are occurring throughout Asia. Tan further stated that his company has been seeking arrangements with a manufacturer that offers a complete water conservation product line that was an all inclusive water conservation package. When we found Ecotech we found exactly what we had been looking for Tan said. After completing our due diligence on Ecotech products we were very impressed with not only the potential for significant water savings for our customers but also the impressive performance of their products. In our opinion in all cases the Ecotech products are the leaders in the industry in both performance and water conservation. The prospect of many of our customers being able to shut off the public water supply after completing a retrofit with Ecotech products and systems is very exciting. Maintenance cost is also a big budget consideration for all of Asia Pacific customers and Ecotech's unique and one of a kind ten year warranty on all products will be well received by our customers. Ecotech's focus on the environment in all aspects of their operations and products was the frosting on the cake stated Tan. The environment is very important to us and with Ecotech's focus on environmentally friendly packaging, reduction in transportation emissions and solid waste reduction our decision was made according to Mr. Tan. Ecotech water products will begin saving a lot of water in Asia immediately. Philip Tan also stated with all the waterless urinals in use in Asia the non changeable Eco Urinal Cartridge alone will have a major impact on the environment by saving the land fill thousands of changeable sealant cartridges that have ended up in the Landfills every month until now. Ecotech Water Asia Pacific will initially focus their distribution efforts throughout Singapore but will be expanding their distribution very soon with additional locations in Australia, New Zealand, China, Hong Kong, Taiwan, South Korea, Thailand, Malaysia, Philippine, Indonesia, India and Pakistan. In other announcements this past week Ecotech also announced they have completed distribution arrangements with Mountain Pass Services Inc, headquartered in El Paso, Texas and serving the Northeastern Mexico markets. Ecotech's CEO also stated that distribution discussions are in process for distribution rights to the Ecotech product lines in South America, Botswana, Africa and Canada. Ecotech headquartered in St. Pete Beach, FL has distributors and sales outlets throughout the United States.

Janssen also stated we are very pleased to be affiliated with Ecotech Water Asia Pacific, Philip Tan and other Ecotech Water Asia Pacific associates. Mr. Tan has an impressive background with more than 15 years experience in developing the Asia markets and distributing a very high volume of products in those locations. Philip holds a diploma in Mechanical Engineering from Singapore Polytechnic, a diploma in Sales and Marketing from the Marketing Institute of Singapore and an MBA from the University of Hull. Ecotech Water Asia Pacific is headquartered in Singapore where Mr. Tan grew up and now lives with his wife and family.
